

Joseph A. Blanco, principal

Cofounder of RESCUE Green Joseph Blanco brings more than 10yrs of management and leadership experience in Construction, Real Estate, start up ventures, telecommunications and in Fortune 500 Companies.

Joseph Blanco is been sought after for his rare blend of operational strengths, leadership and most of all his network of professionals which has allowed him to meet and beat the clients bottom line

Joseph Blanco has also started various successful business that he still owns and operates such as; United Supply Solutions, a web based business providing printing supplies for small and large business, Real Estate and Investment division that forms and manages investor funds for the purpose of purchasing real estate, a credit repair division that has been extremely effective in the removal of bad debt from consumer credit reports, and finally one his first successful projects as a young man, his mobile detailing business that serves the inland empire for over 10yrs now.

Mr. Blanco's ability to network has allowed him to have a significant impact on profitability and growth with all ventures he pursues. Working together with local builders in Southern California, Mr. Blanco gained all the necessary expertise to manage in every aspect of the construction and development arena.

The last three years he has spent in research and development of RESCUE Green, educating himself in green methods, rating systems and products. Using this knowledge to help building professionals become more sustainable is his and RESCUE Green mission. Mr. Blanco role in RESCUE Green is to oversee Operations, Customer Relations, Finance department and Sales and Marketing.

For the work he has done in the green building arena he has been widely recognized as expert in this field. The University of California, Riverside has asked him to teach green building to the new wave of building professionals hitting today's job market. As a professor at the University of Riverside on GREEN Building, he is perusing the development of other courses such as Financing Green Building and training course for certified environmental auditors.

As a board member of the board of directors of two non-profit companies; The Solar Energy Council and The EDGE Education he has been a leader in establishing education and green building criteria for the industry as well as helping these companies tool their marketing to effectively hit the industry. Mr. Blanco is active with the local USGBC chapter and is the chair of the Utilities committee; in addition he has worked with non-profits such as SCANPH and RHDC to set better standards for a more sustainable affordable housing sector.
